Aziz Bibitow

iPhone App Developer

I'm Aziz, an iOS developer with 4+ years of experience. I build high-quality apps quickly using Swift, SwiftUI, and UIKit.

I write clean, maintainable code, follow SOLID principles, and use TDD to keep things stable and future-proof. I've built apps in categories like delivery, chat, social, e-commerce, marketplace, content sharing, entertainment music, and AI-driven solutions. I've also worked with Stripe payments, Firebase Cloud Functions, and ELD integrations via BLE.

I'm a disciplined professional and problem solver with a strong interest in technology and well-designed systems that solve real problems, meet business goals, and deliver real value.

I stay on top of the latest iOS trends and best practices to deliver modern, scalable apps that users find convenient and enjoyable to use.

Experience

2023 - Present
Pikir & Selbi Consulting, LLC
iOS Developer
Developed a marketplace iOS app in Swift with Stripe integration and Firestore. Implemented backend features with Cloud Functions for notifications and payments. Built an ELD iOS app using IOSiX SDK, Alamofire, and continuous location tracking, ensuring clean, maintainable code following SOLID principles.

2023 - Present
Freelance
iOS Developer
Freelanced on Upwork and undertook projects from local clients and businesses in Turkmenistan. Built and published a range of iOS applications—including E-Commerce, Delivery, and Content Sharing apps—on the App Store.

2022 - 2023
Salam H.J.
iOS Developer
Developed, published, and consistently maintained News, Messaging, Social Media, and Delivery apps on the App Store

2021 - 2022
Digital Pen
iOS Developer
Oversaw the end-to-end development, App Store publication, and continuous maintenance of Music Player and News applications.
