Aziz Bibitov

Experienced iOS Developer | Swift, SwiftUI, UIKit | AI-Powered Apps & MVP Builds

Ashgabat, Turkmenistan • +993-65-13-85-37 • azizbibitov11@gmail.com

Portfolio • LinkedIn • GitHub • Upwork

PROFESSIONAL SUMMARY

iOS Developer with 5+ years of experience building production-ready apps that ship and stay in the App Store across video streaming, logistics, e-commerce, fintech, and social. Owns the full iOS scope end to end, from the first screen to the App Store release build, and increasingly the backend behind it. Specializes in clean, maintainable architecture (MVVM, MVVM+C, Clean Architecture), payment integrations, real-time media, and AI/LLM-powered features. Writes code the next developer can read and extend, and communicates clearly throughout delivery.

TECHNICAL SKILLS

Languages: Swift, Objective-C, C fundamentals, Python, JavaScript/Node.js
UI Frameworks: SwiftUI, UIKit
State & Reactive: SwiftData, Combine, RxSwift
Architecture: Clean Architecture, MVVM, MVVM+C, SOLID principles, TDD
Apple Platforms: iOS, iPadOS, macOS, watchOS, tvOS
Payments: StoreKit, Stripe, Apple Pay, Razorpay
Media: AVPlayer, AVFoundation, VLCKit, video/audio players, downloads, live streaming
Maps & Location: MapKit, CoreLocation, real-time tracking, offline-first (GRDB)
Notifications: APNs, PushKit, CallKit
Backend & APIs: REST, Alamofire, Firebase (Firestore, Cloud Functions), Node.js, Express, FastAPI, MongoDB
AI / ML: LLM integration, natural-language parsing (Groq), pose detection via MediaPipe
App Extensions: Share Extension, Network Extension (Packet Tunnel)
Hardware / IoT: IOSiX ELD SDK, Bluetooth (BLE)
Tools & Process: Xcode, Git, XCTest, XCUITest, App Store submission & review, performance optimization

PROFESSIONAL EXPERIENCE

Kämil Ulgam | Ashgabat, Turkmenistan *Jun 2025 – Present*

iOS Developer

- Developed, published, and maintained a production social media application on the App Store, owning the full iOS scope.

Freelance (Upwork & Contract Clients) | Remote *Jan 2023 – Present*

iOS Developer

- Designed, built, and published e-commerce, delivery, content-sharing, and social apps on the App Store for international and local clients.
- Delivered complete MVPs end to end: iOS app, backend (Firebase or Node.js/Express/MongoDB), payments, and App Store review.
- Integrated AI/LLM features such as natural-language expense parsing and AI fitness pose detection into shipping products.
- Maintained a **5-star Upwork rating** with repeat clients citing on-time delivery, responsiveness, and attention to detail.

Pikir & Selbi Consulting, LLC | Remote *Sep 2023 – Oct 2024*

iOS Developer

- Built a marketplace iOS app in Swift with Stripe payments and Firestore; implemented Cloud Functions for notifications and payment processing.
- Developed an FMCSA-compliant ELD app for commercial trucking using the IOSiX SDK, Alamofire, and continuous CoreLocation tracking.
- Followed SOLID principles to keep code clean, testable, and maintainable.

Kinda Smart Inc. | Remote *Jun 2023 – Sep 2023*

iOS Developer

- Contributed to feature development and maintenance on a live AI fitness codebase (KinesteX), redesigning UI and adding new features.

Salam H.J. | Ashgabat, Turkmenistan *Jul 2022 – Jun 2023*

iOS Developer

- Developed, published, and maintained news, messaging, social media, and delivery apps on the App Store.

Digital Pen | Ashgabat, Turkmenistan *Jun 2021 – Jul 2022*

iOS Developer

- Oversaw end-to-end development, App Store publication, and ongoing maintenance of music player and news applications.

SELECTED PROJECTS

- **Horjun —** Subscription video streaming app with live TV, on-demand content, and offline downloads (AVPlayer, VLCKit, SwiftUI).
- **Meninki —** Social marketplace app: Pinterest-style shop feed, product catalogue, cart and orders; UIKit, MVVM, RxSwift, custom reactive Binder, REST backend.
- **Salam Messenger —** Social app with real-time chat, posts, stories, voice messages, and push notifications.
- **Slate —** AI finance tracker; log expenses by natural language or voice parsed by an LLM (Groq). Offline-first with SwiftData and iCloud sync (Swift 6, SwiftUI).
- **Quiet —** Bring-your-own-server VPN client using VLESS + Reality via the Xray engine; SwiftUI + NetworkExtension, two-target Packet Tunnel architecture.

EDUCATION

Magtymguly Turkmen State University *2019 – 2024*

Bachelor of Science — graduated with a perfect GPA (straight A's). Qualified as Systems Programmer, Mathematician, and Mathematics & Informatics Teacher.

LANGUAGES

English, Russian, Turkish, Turkmen
